

Errata

NOTE: The following errata only pertain to the published version of the TAAI 2011 conference. Numerous editorial changes have been made to the text and table. The following changes were considered significant to mention:

Description of Errata and Corrections in text

Page	Section	Description	Reads	Should Read
3	CRF Alignment Labeling	In particular, “while the first, the second...”	while the first, the second, the fourth and the fifth “standard runs”	while the first, the second, the <i>fifth</i> and the <i>sixth</i> “standard runs”
3	CRF with AV	For instance, consider strings with two characters, “in which one of the strings “RA” is ranked...”	in which one of the strings “RA” is ranked $r = 4$. Therefore, the column of two-character feature tokens has “R” denoted as 4B and “A” denoted as 4E.	in which one of the strings “RA” is ranked $r = 5$. Therefore, the column of two-character feature tokens has “R” denoted as <i>5B</i> and “A” denoted as <i>5E</i> .

Table IV. Example of CRF training data with AV features

Input	AV Feature					Label
	1 char	2 char	3 char	1 char	2 char	
R	7S	5B	4B	2B	0B	B拉
A	7S	5E	4B ₁	2B	0B	I
N	6S	5E	4E	2B ₂	0B ₂	B纳
A	7S	5E	3E	2B ₁	0B	I
R	7S	5E	3E	2B ₂	0I	I
D	7S	2E	3E	2E	0E	B德

Alternate Table IV. Example of CRF training data with AV features

Input	AV Feature					Label
	1 char	2 char	3 char	4 char	5 char	
R	7S	5B	4B	2B	0B	B拉
A	7S	5E	4B ₁	2B ₁	0B ₁	I
N	6S	5E	4E	2B ₂	0B ₂	B纳
A	7S	5E	3E	2E	0I	I
R	7S	5E	3E	2B ₂	0E	I
D	7S	2E	3E	2E	0E	B德

NOTE: Table IV as published has some typos. Alternate Table IV has been amended which included table caption and positioning tag of input string in the AV feature of four and five characters.

We apologize for any inconveniences this may have caused you.
